

**DFUG 2019**

SEPTEMBER 26 - 27 | ANNAPOLIS, MD

# Looking Forward

DF/Net Software, September 27 2019

# Near Future

- API work for ePRO
- DFsend as a browser-based tool
- Workflow, eSignatures, lookup tables in DFcollect/DFweb
- Licensing
  - phone home, #studies based, assign seats to studies, read-only user, long-term study, pay as you go
- More standard reports
  - generate TLFs from list view, trending

# Simplifications

- Final / Incomplete -> Save
- Clarification / Correction
- Schedule View – bye, bye DF\_QCupdate

# Future++

- Dynamic user-defined metadata
- More permissions
  - Limit the use of API clients, query categories, view metrics data
- DFcollect – device, cache management
- Combine DFexplore, DFcollect, DFweb

# Wishlist

- These wishlist items were collected during the meeting
  - more logging/reporting: user changes, setup changes, system changes
  - more properties for user accounts: date created, by whom, training?
  - repeating modules that appear only when previous module has been completed
  - change value of a user-defined property in an edit check
  - licensing model not based on seats
  - delete multiple records at once
  - make underlying report data available
  - dump study config to DFsqlload tables
  - creation/deletion of multiple missed plate records
  - database replication and snapshot
