

Data management and data science solutions.

Your data matters, which is why we
handle and analyze it with care.

Supplement your team's expertise with professional data management, collection, and reporting from DFnet. Available either on a project basis or as a contractor embedded directly in your team, the decades we've spent helping clinical organizations across the globe make our team uniquely positioned to supplement yours.

Enhancing success and broadening impact.

From setup to submission, our data management and data science solutions help your study run smoothly and find the truth in your data.

- We configure your database and pioneer advanced data collection with trusted data management practices
- We perform continual analysis of the data, from report generation to customization and synthesis
- Our team can take the lead, helping you deliver meaningful insights that matter to your study

**Because the health of the world depends
on the health of your data.**

dfnetresearch.com

“Our organization has used DFnet for Phase 1-4 studies since 2004, including for an international, pivotal Phase 3 study which resulted in a New Drug Approval from the FDA. I can't imagine us having worked with anyone else for our data collection and data management needs.”

Senior Biostatistician
United States

Dedicated to the betterment of data for global health.

eClinical Data Management Services

CDASH Compliance

Achieve end-to-end CDISC compliance. We align your systems to the CDASH model, ensuring data is collected with continuity and harmony.

Database Setup

Our team ensures everything meets your specific study needs by configuring system and security settings, user permissions, collection tools, and more.

Protocol Implementation

The protocol is expertly translated to software settings by our team, ensuring the system is ready to capture the full intent of your research.

Methodology Coaching

Throughout your project, we can help you implement best practices, identify early issues, and resolve site inconsistencies.

Data Quality Assurance

With oversight from DFnet, our team can monitor inputs, optimize collection methods, and minimize human error to ensure the highest accuracy.

Documentation and Compliance

From proper protocol documentation to regulatory requests, we help achieve compliance through proper documentation, training, and reporting.

Data Sciences Offerings

SDTM and ADaM Standardization

We'll refine your systems to SDTM and ADaM standards, ensuring your data follows proper tabulation and sequential formats for submission.

Progress Monitoring

Whether you want to monitor the rates of enrollment, revise protocols, or ensure your project is on track, let DFnet assist in collecting meaningful insights.

Safety Review

DFnet's ongoing, timely safety reporting, real-time monitoring, and risk assessment and management play a vital role in ensuring participant safety.

Data Integrity Assurance

Through oversight and ongoing interpretation, we drive consistency and reliability of your important work through strong, clean data.

Dashboards and Reporting

Whether by configuring real-time dashboards or formal reports for sites, sponsors, and partners, we help you turn simple information into valuable insight.

Analysis and Synthesization

Beyond simple reporting, our team brings meaning to your clinical initiatives, which will enhance your impact in this world.

Compelled by people, propelled by technology.
