Getting Help

For software support, Please contact the DFdiscover team:

- via email, help@dfnetresearch.com.
- Visit our website, <https://www.dfnetresearch.com>.

Conventions

A number of conventions have been used throughout this document.

Any freestanding sections of code are generally shown like this:

```
# this is example code  
code = code + overhead;
```

If a line starts with # or %, this character denotes the system prompt and is not typed by the user.

Text may also have several styles:

- Emphasized words are shown as follows: ***emphasized*** words.
 - Filenames appear in the text like so: dummy.c.
 - Code, constants, and literals in the text appear like so: main.c.
 - Variable names appear in the text like so: nBytes.
 - Text on user interface labels or menus is shown as: **Printer name**, while buttons in user interfaces are shown as `Button` .
 - Menus and menu items are shown as: `File` > `Exit`.
-

Introduction

This chapter introduces **DFsend** and provides prerequisites for its installation and use.

What is DFsend?

DFsend is a desktop application providing functionality for users who need to securely transmit scanned PDF study documents from a local computer to a **DFdiscover** study server, over the internet, without requiring direct access to a specific study database.

DFsend includes user authentication, encryption and tracking and provides a safe and reliable alternative to faxing or emailing study CRFs to a **DFdiscover** server.

The next chapter describes the steps for installing the **DFsend** application and getting started. This is followed by a chapter that explains how to use **DFsend**, and ending with a chapter that describes transmission logging.

Prerequisites

There are several methods for creating an electronic PDF copy of one or more paper forms. The most common is to use a scanner. Scanners are typically standalone hardware devices or part of a multi-function device that also includes copying and printing.

The most important prerequisite when using a scanner is to ensure that the scan settings are compatible with the expectations and limitations of the image processing in **DFdiscover**. This typically manifests itself in two places:

- Scanned documents may be B&W (black and white), grayscale or color. B&W scans create files that are smaller than grayscale or color scans, and hence B&W scans are quicker to send.

Scan resolution must be between 100 and 300 dpi. The higher the resolution, the clearer the document, but this also creates a larger file size, which takes longer to transmit. 200 dpi is generally an acceptable compromise between higher scan quality and smaller file size.
- The page size must be US Letter (8.5 x 11 inches, 216 x 279 mm) or A4 (8.27 x 11.7 inches, 210 x 297 mm). Other page sizes will lead to cropping or scaling of the result, yielding pages that look incorrect in **DFdiscover**. If the scanner has an automatic sheet-feed mechanism, ensure that the paper guides are set snug to the width of the paper.

If you are using **DFsend** on a regular basis, it is worthwhile implementing and following a local file naming convention. Having a standard naming method and consistent use of folder locations for documents that you have scanned and transmitted will simplify your work process.

Getting Started

This chapter covers the installation of the **DFsend** application and login instructions.

Installation

The **DFsend** application is available for **Windows** and **macOS**. It must be installed on the local computer before use.

Windows Installation and proper operation of the **DFsend** application requires **Windows 10**.

1. The Windows application is distributed as a Windows msi installer file. The file, named dfsend.msi, is available for download from www.dfnetresearch.com. It may also be available from the study sponsor.
2. Download the installer file to the local computer.
3. Double-click the dfsend.msi file. Installation begins automatically. Installation must be performed on the local computer.
4. Once complete, the installer adds the **DFsend** icon to the desktop as well as an entry in the **Start** menu.

macOS Installation and proper operation of the **DFsend** application requires *macOS 10.14 (Mojave) or later*.

1. The macOS **DFsend** client is distributed as a pkg installer file. The file, named DFsend.pkg, is available for download from www.dfnetresearch.com. It may also be available from the study sponsor.
2. Download the installer file to the local computer.
3. Double-click the DFsend.pkg file.
4. Follow the on-screen instructions in the installation program. Installation must be performed on the local computer.
5. Once complete, the installer adds the **DFsend** icon to the **Applications** menu.

Login

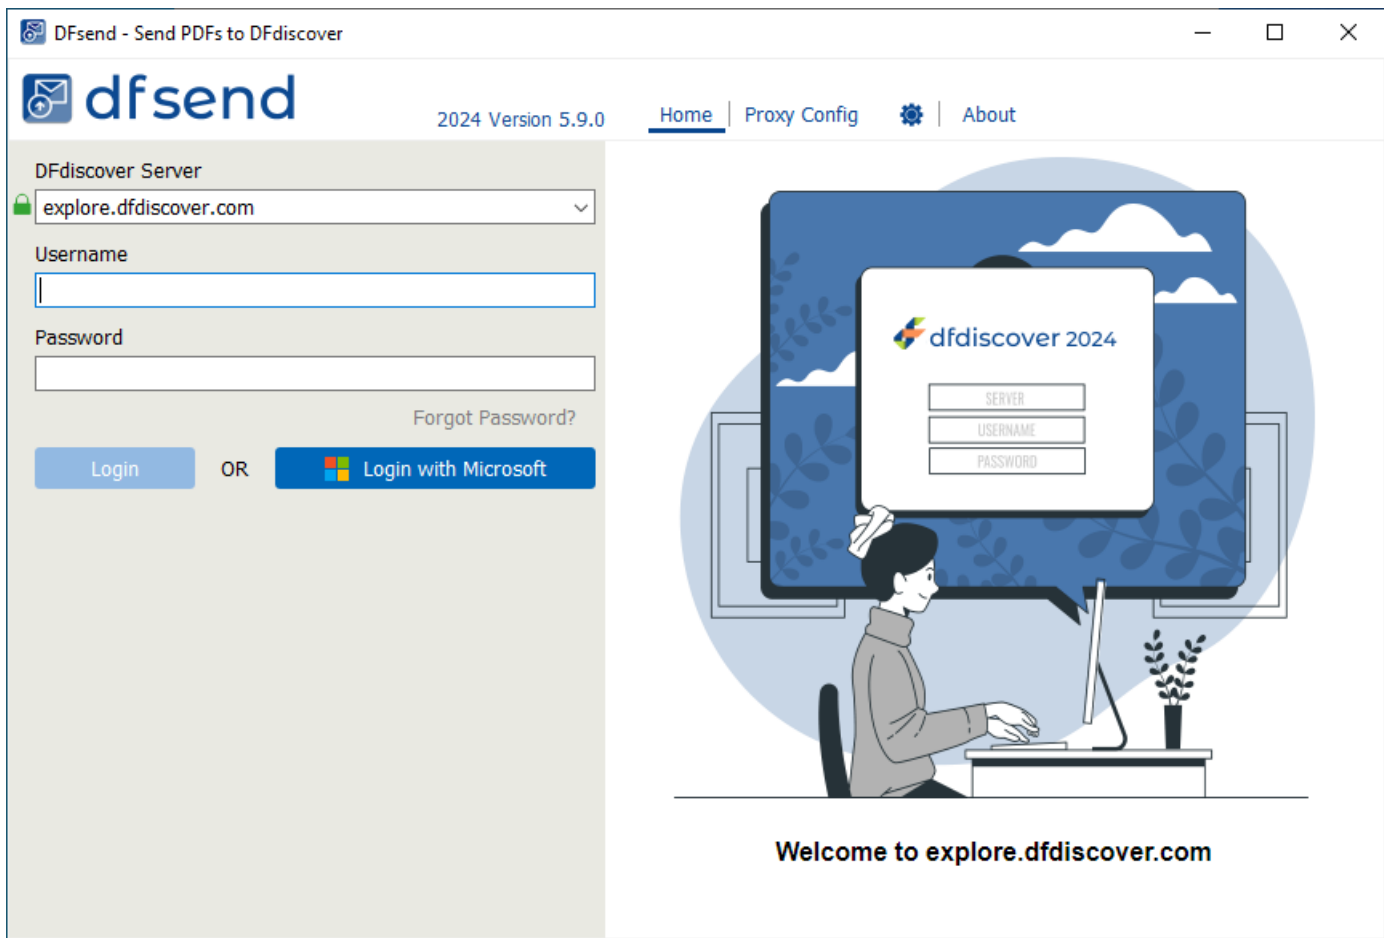

Sending scanned PDF documents to a study requires login credentials for the **DFdiscover** server where the study is hosted. This also requires an internet connection. The study coordinating site will have provided you with:

- access to the **DFsend** download
- the name of the **DFdiscover** Server
- a unique username, and
- an initial password.

DFsend may be installed as an icon on your desktop or as a menu item in your **Start** menu (**Applications** menu in **macOS**).

Launching **DFsend** displays the login dialog.

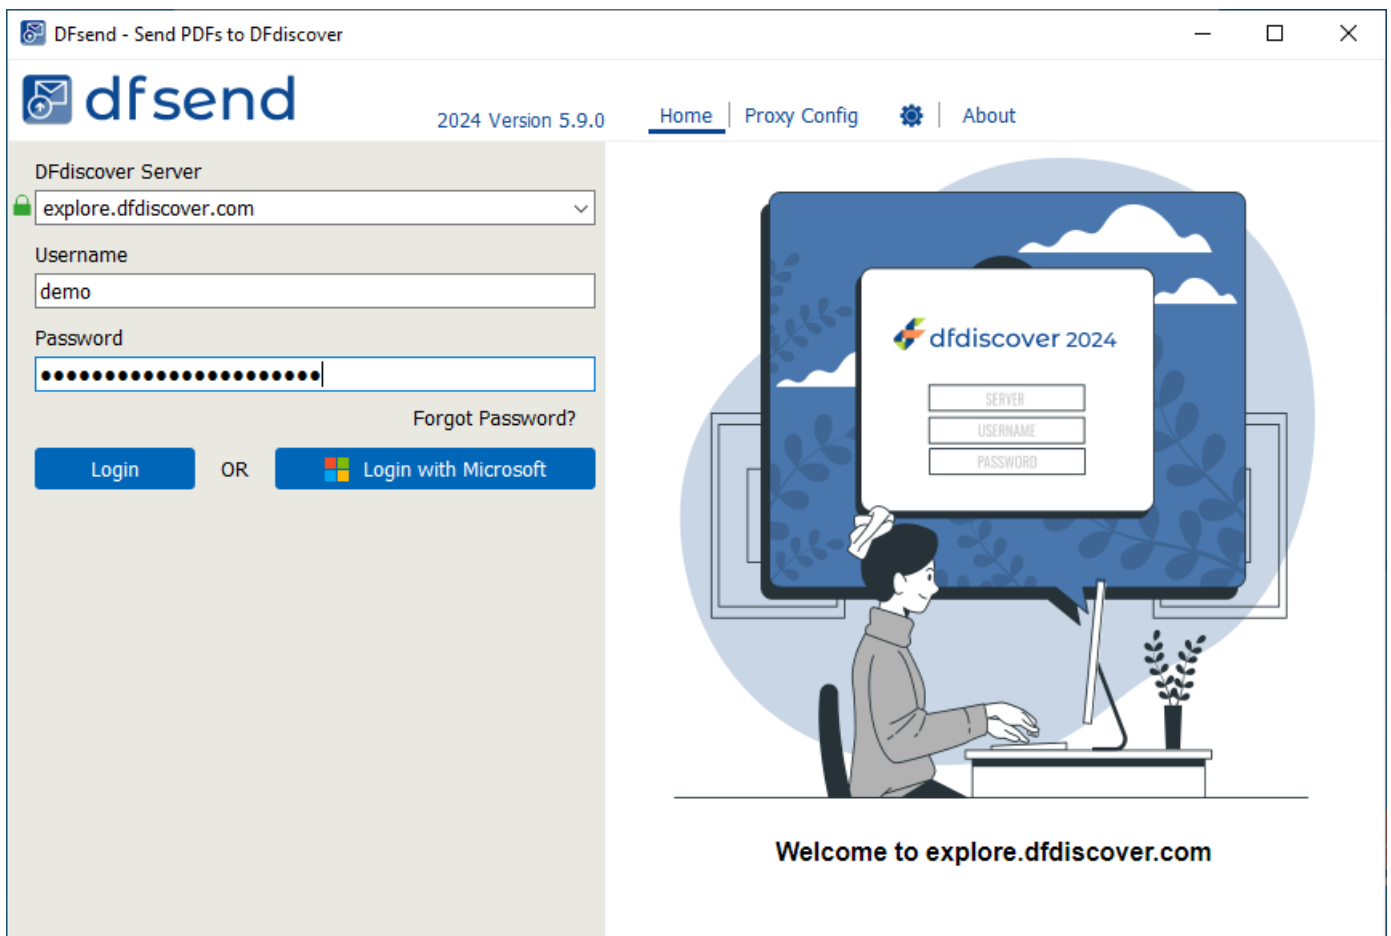

Each use of **DFsend** requires login using your unique credentials. To complete login:

1. Optional: In some configurations, your local IT infrastructure may require a proxy server for applications that connect to the internet. Your local IT department will supply the necessary information. To configure local proxy server settings, click **Proxy Config** at the top of the login screen. Complete the required fields in the sub-dialog. Click **Home** to return.
2. Enter the name of the **DFdiscover Server**. There may be a slight pause after entering the name while **DFsend** is locating and resolving the entered server name.

IMPORTANT: Technically, this is the FQDN (fully-qualified domain name) of the server - in local installations, it may be only a local name, but more typically is a full .com, .org, .edu, etc, domain name.

The right-half of the login dialog updates if the **DFdiscover** administrator has specified a custom banner.

3. Enter your credentials in the **Username** and **Password** fields and click **Login** to complete the login. Credentials unique to you are provided by the **DFdiscover** or study administrator.

If Single Sign On with Microsoft is enabled on your **DFdiscover** server, a [Login with Microsoft](#) button is shown. You can log in with your Microsoft account instead of using your **DFdiscover** username and password. Click [Login with Microsoft](#) to begin the Microsoft login process.

In some cases, [Login with Microsoft](#) may be the only method of login available, depending on how the study coordinating center has configured the **DFdiscover** server.

NOTE: If you log in using a Microsoft login, any password requests during your **DFsend** session will require you to authenticate using the same Microsoft login process.

4. If there is an error, an information message is displayed in the login dialog. The error must be corrected before you can proceed.
5. If the server and credentials are correct, the login dialog is dismissed and the main **DFsend** window is presented.

IMPORTANT: If this is your first time using your username and password, or you have been provided a one-time reset password, you are prompted to choose a new password before proceeding. It is also possible that the password expiry period has elapsed and you are prompted to choose a new password.

The administrator of the DFdiscover Server may have enabled two-factor authentication for your login account. If it is enabled, after successful authentication the login screen updates to request the security code. Independently you will receive an email with the 6-digit security code. The email is sent to the email address on file for the account. Enter the 6-digit security code in the field labeled **Please enter the security code that we just sent you**. After entering the code, click [Login](#) again to complete login.

DFsend remembers your most recent servers (and proxy servers), so you need to enter the **DFdiscover Server** information once. If you are using **DFsend** with multiple servers, use the pull-down for the **DFdiscover Server** field to select a previous, recent value.

Your **Username** and **Password** must be entered (or, if using Single Sign On with Microsoft, you must authenticate using the Microsoft login process) each time you login. All pages transmitted with **DFsend** are logged with the username associated with your login. Like any computer system, be vigilant to protect your username and password, and immediately report any suspicious account activity to your IT department and the study coordinating site.

DFsend includes password aging, an FDA regulatory requirement. With password aging you will be requested to specify a new password at regular intervals. The password interval is set by the **DFdiscover** administrator at the study coordinating site.

If you forget your password, you can request a password reset from the login dialog. First enter the server name and your username into the login dialog, then click **Forgot Password?**. You are asked for your email address, which must match the email address for you on this server. A link to reset your password is emailed to you. Click the link and follow the instructions to set a new password, then return to the login dialog to log in with your new password. This feature is only available if it has been allowed by the **DFdiscover** administrator.

Exiting DFsend

When you have completed transmission of documents for a session, choose **File** > **Exit** to exit **DFsend** and terminate the application. Since all activity is recorded using the login username, it is important to not leave **DFsend** unattended or open on your desktop.

To prevent unattended use of **DFsend**, an autologout interval of 15 minutes is enforced. If **DFsend** is idle for the autologout interval, it automatically closes the current login session.

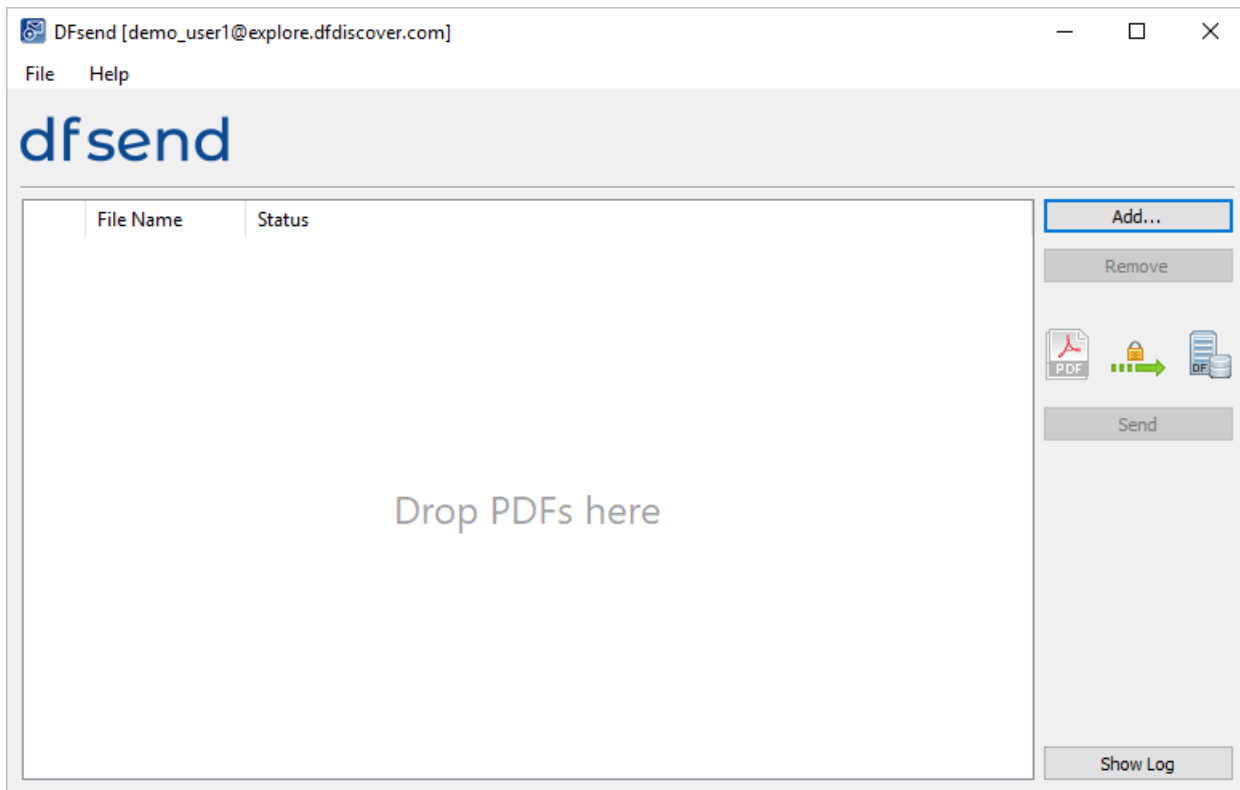

To continue, click **Login again**, or **Exit** and restart **DFsend**.

Using DFsend

This chapter describes how to use **DFsend** to send PDF files to a **DFdiscover** study server.

The Main Window

After successful login to **DFsend**, the main window is presented.

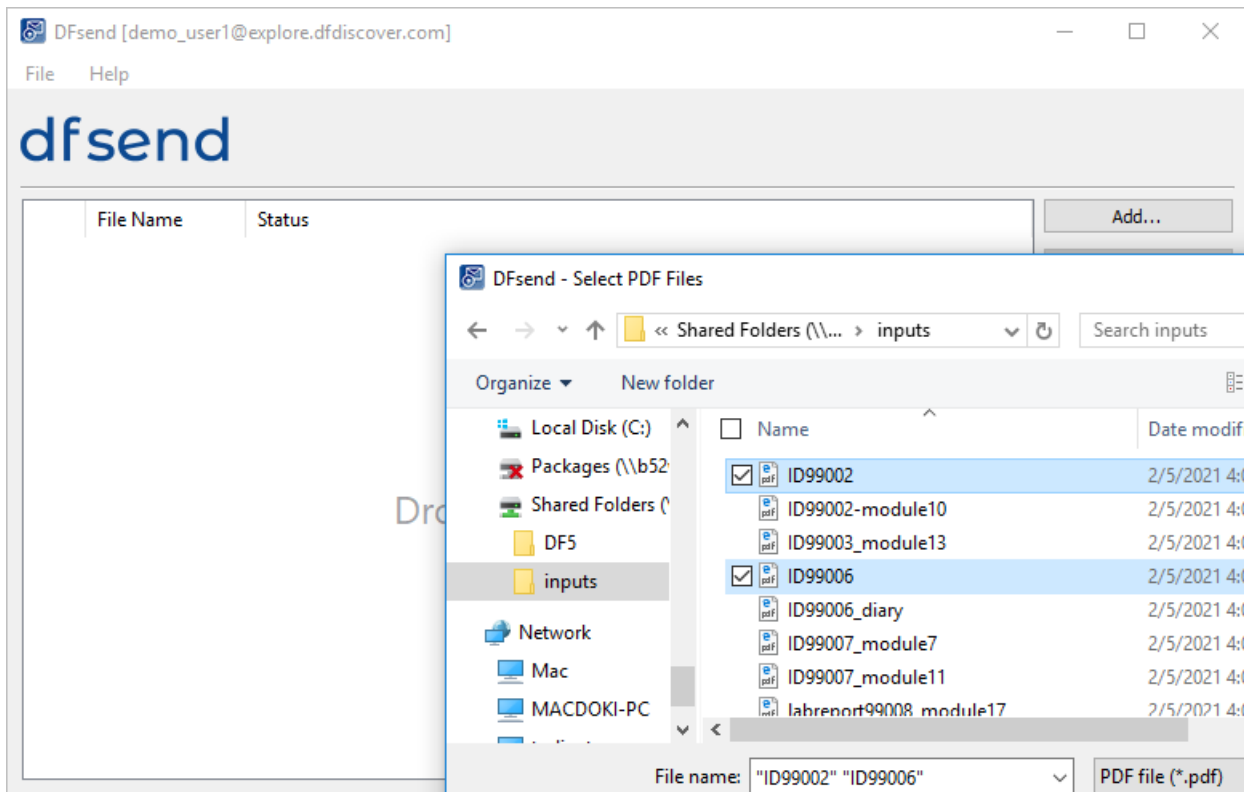

PDFs to send are added to the list area (**Drop PDFs here**) and there are several action buttons to act on the current items in the list.

When **DFsend** is opened for the first time, the list is empty and the only available action is **Add**

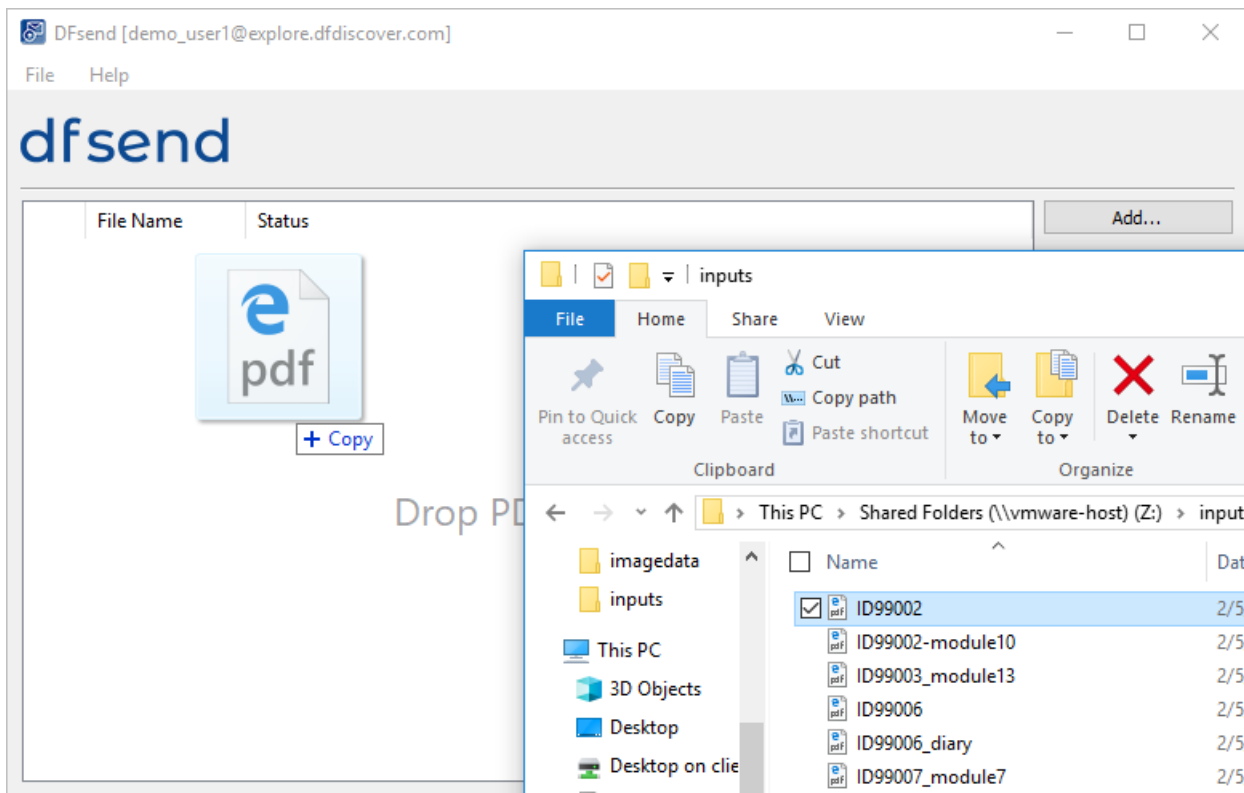

Adding Files for Transmission

Any PDF file(s) to be sent to the **DFdiscover** study server must be added to the list area in order to be processed. PDF files can be added in one of two ways:

1. Click **Add**. From the **Select PDF Files** file selection dialog, locate the desired PDF files on the local computer, select them and close the file selection dialog.

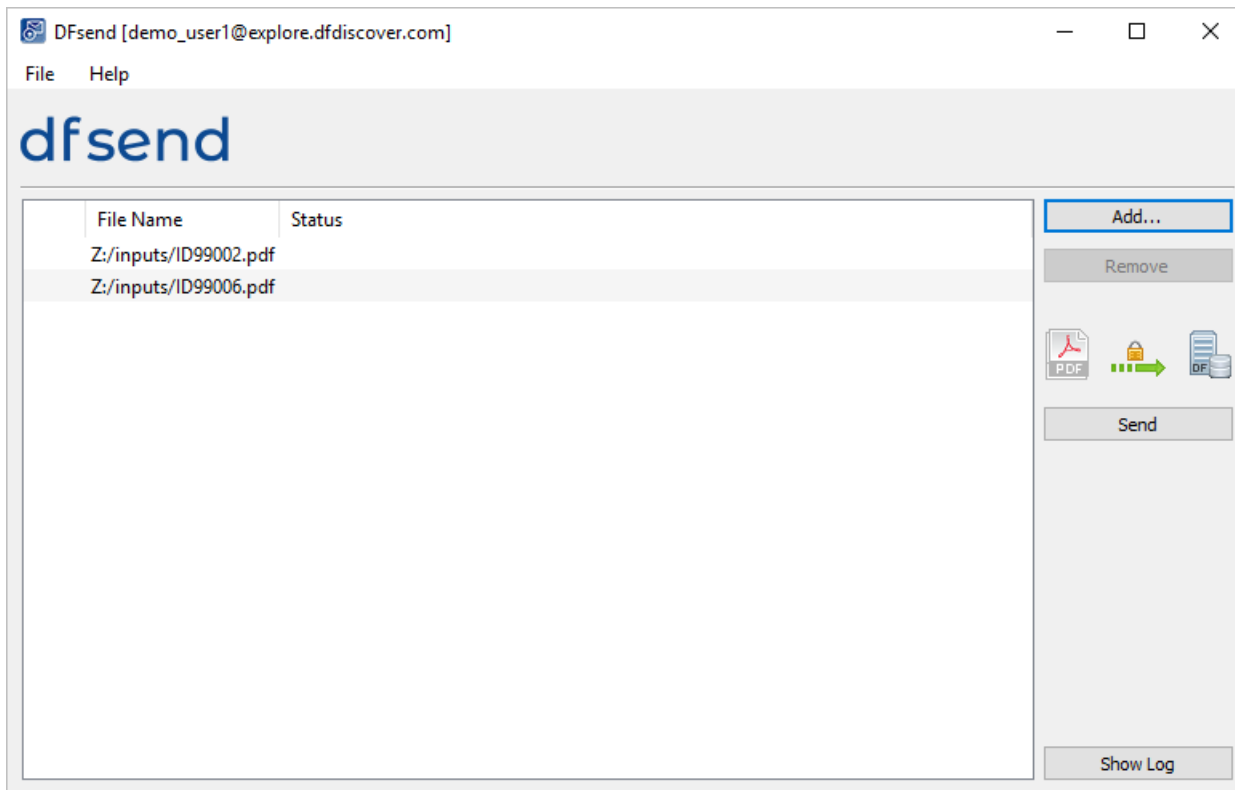

2. Or, drag-and-drop the desired PDF files from a local file folder directly into the list area.

Both of these actions can be repeated as needed to add files from different locations.

Only PDF files may be loaded and sent by **DFsend**. It is not possible to add files having extensions other than .pdf to the list area, either by drag-and-drop or by using the file selection dialog.

Files that have been loaded but not yet sent, are displayed with their full path name. There is no **Status** available for files that have not yet been sent.

Remove Added Files

Any PDF file to be sent, that has been added to the list area, may be deleted prior to sending.

To delete a recently added file, select its entry and click **Remove**.

To remove all files in the list area, type **Ctrl+A** (or select a subset of files) and click **Remove**.

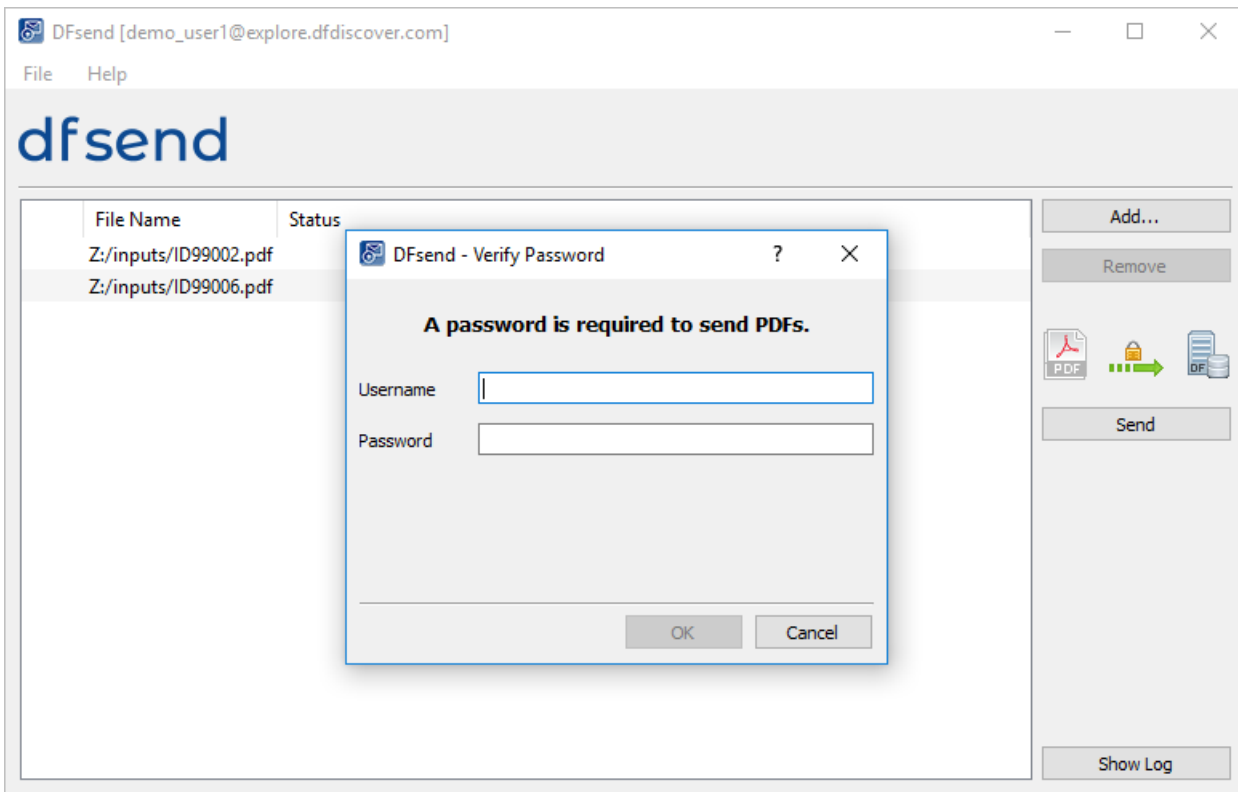

Sending Files to the **DFdiscover** Server

A typical workflow is to add several documents and then send them with one action. In this scenario, each document is sent separately, but with one single action. It is also possible to add and send a single file at a time.

After clicking **Send**, each PDF file identified in the list area is sent to the **DFdiscover** study server.

Each time you send documents, sender verification occurs and you are prompted to confirm your identity - this is in keeping with the requirements of 21 CFR Part 11. For each login session, the first verification requires username and password. Subsequent transmissions in the same login session require the password only.

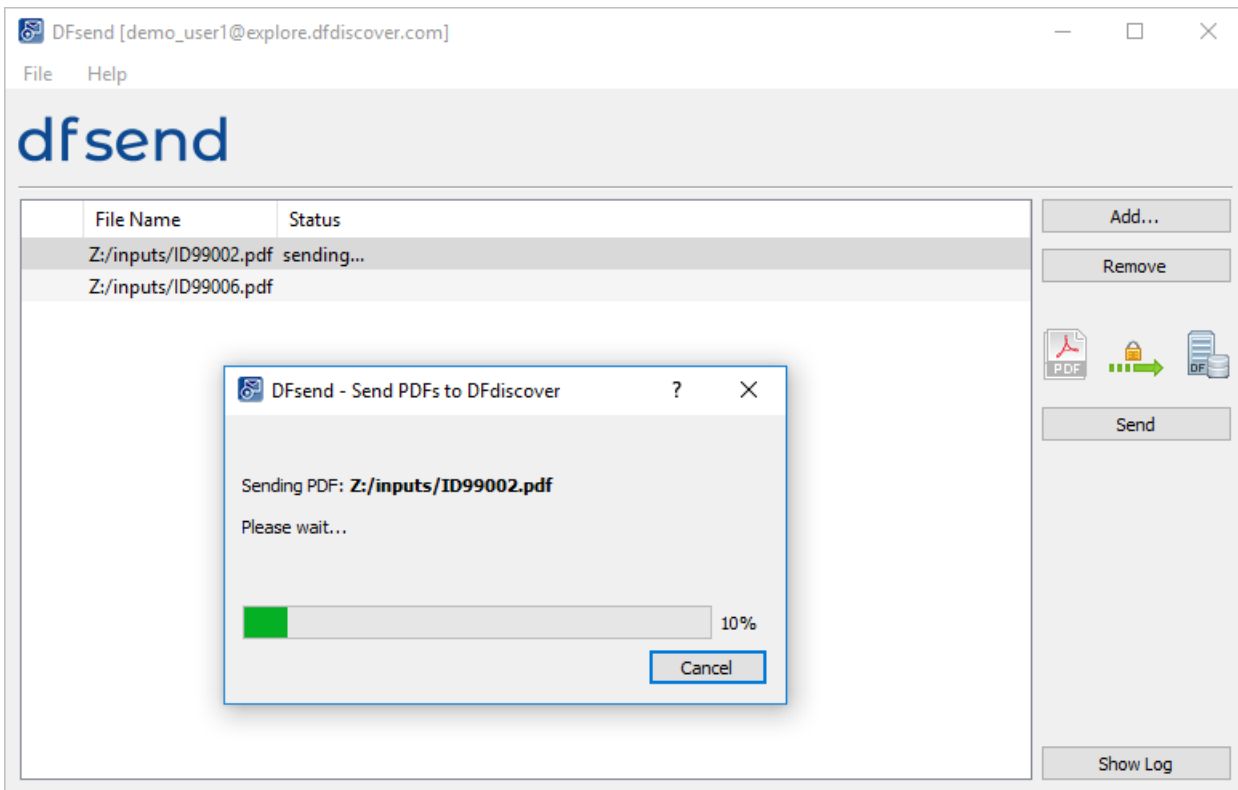

IMPORTANT: Multiple consecutive attempts to confirm with invalid credentials causes sending to fail, the user to be logged out and a notification email to be sent to the administrator. The specific number of consecutive attempts is determined and set by the administrator.

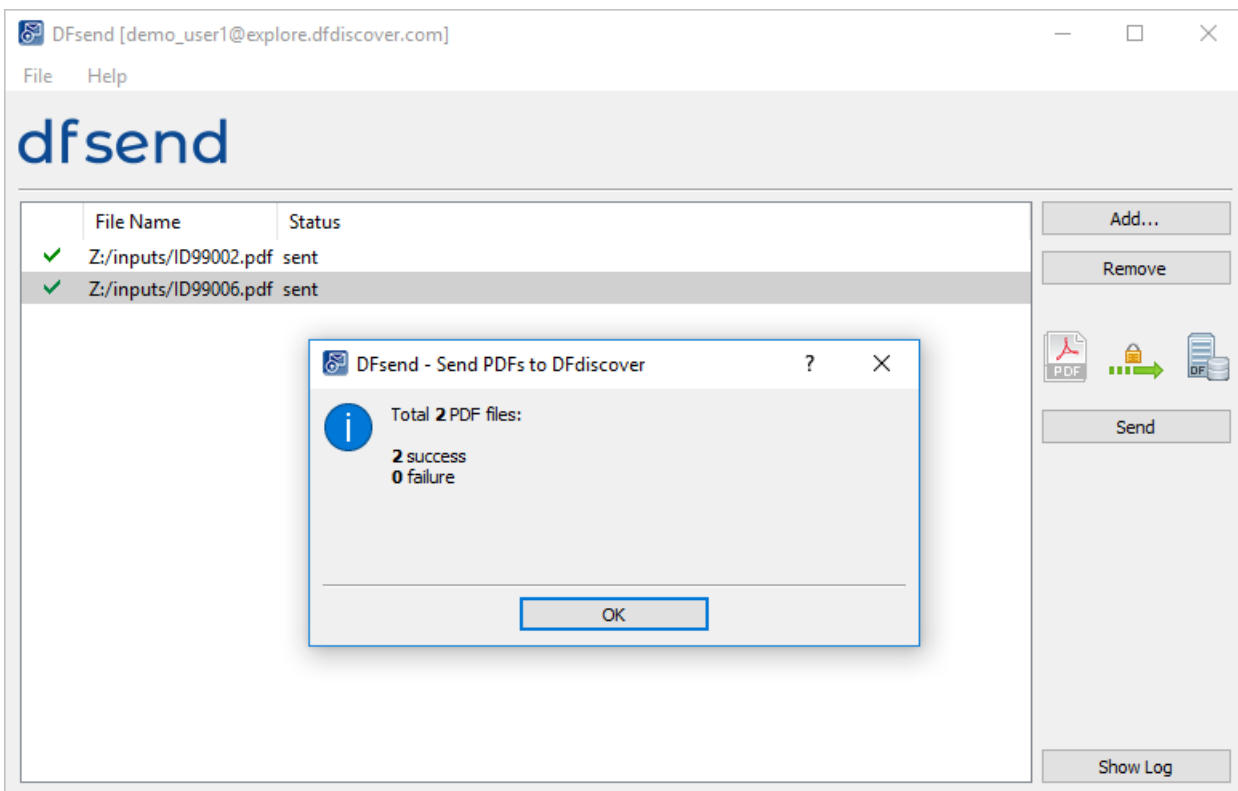

If you logged in using a Microsoft Login, the dialog below will appear instead. Click [Sign with Microsoft](#) to continue.

Once you have authenticated, sending begins at the first file in the list and proceeds one file at a time down the list. While files are being sent, a progress dialog is displayed.

As each file completes, the **Status** column for that entry is updated to display the file's transmission status. Once the transmission of all files has completed, the summary dialog is presented.

When the summary dialog is closed, the list area is cleared of all successful transmissions. If there were any failures, entries for the failed transmissions remain in the list area for the current **DFsend** session. This makes it easy to re-attempt sending.

Processing After Transmission

Files submitted successfully to the **DFdiscover** server are processed in the same manner as pages sent by email or fax. Any barcoded pages are submitted to the new record queue for the appropriate study, where they can be retrieved and entered using **DFexplore** in **Image View**. Pages without barcodes are forwarded to the **Image Router**.

Canceling File Transmissions

Once **Send** is clicked and valid credentials are provided, all PDF documents in the list area are queued for sending. If more than one document is being sent, **Cancel** is enabled and can be clicked to cancel the queued, and not yet sent, documents.

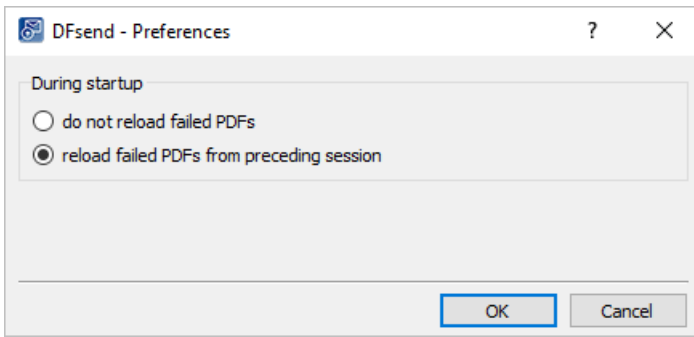

If only one file has been loaded and queued for sending, the in-progress transmission cannot be canceled. Hence, **Cancel** in the progress dialog is not enabled.

Clicking **Cancel** can abort the transmission of those PDF documents that have not yet been sent. **Cancel** cannot abort the transmission that is in progress, nor can it undo any transmission that has already occurred.

Preferences

DFsend has one preference that can be set at the user level. The preference controls the behavior of **DFsend** when it starts, specifically in relation to memory of previously failed transmissions:

- **do not reload failed PDFs** - PDFs that failed to send in the current **DFsend** session are not reloaded into the next session once the existing session is closed,
- **reload failed PDFs from preceding session** - failed PDFs for the current **DFsend** session are reloaded into the next session once the current session is closed.

Preferences are user-specific. Any change to preference setting is applied immediately and is preserved across **DFsend** sessions.

User Profile, Change Password

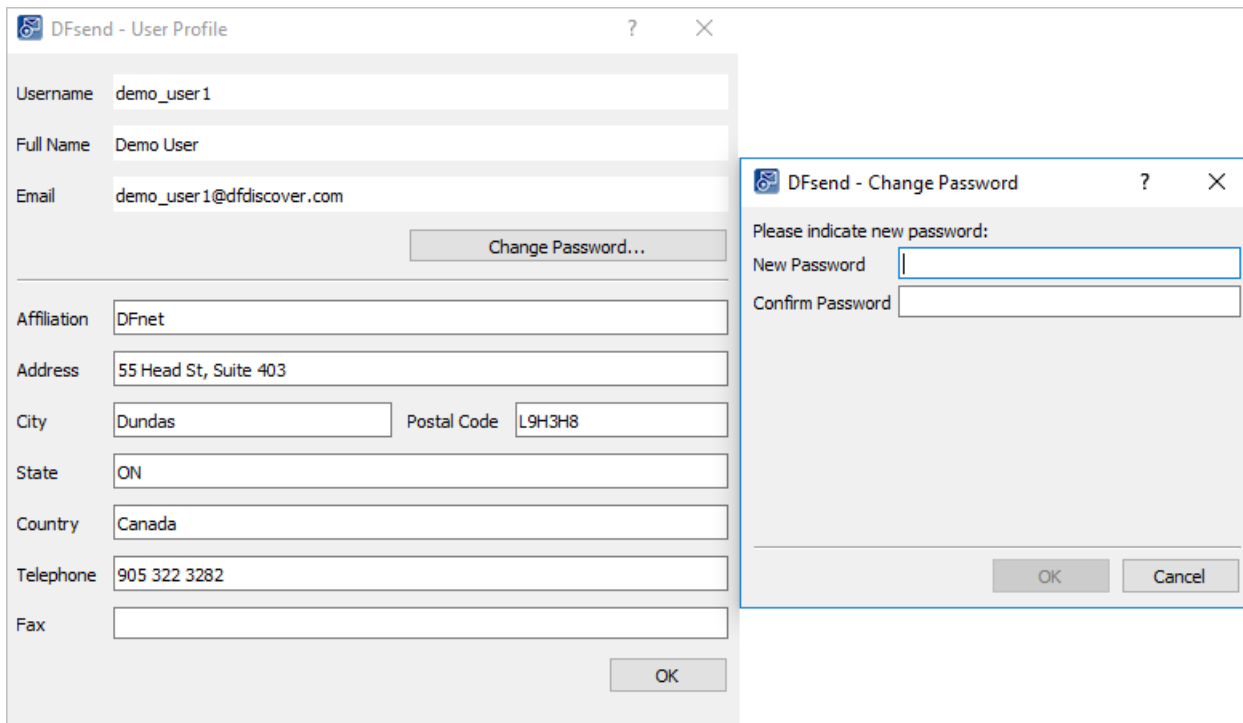

When the **DFdiscover** administrator created your account, they defined a user profile for you. That profile includes your name, your mailing address, your contact information and your password.

You can examine your current user profile by choosing **File** > **User Profile...**.

Values below the horizontal rule can be edited. It is not possible to change your **Username**, **Full Name**, or **Email**. Edited values are saved when clicking **OK**.

IMPORTANT: The **DFdiscover** administrator can centrally update the **Full Name** or **Email** if necessary.

You can change your password at any time by clicking **Change Password...**. The dialog requires you to enter a new password and then re-type it to confirm the changed password. If you logged in using a Microsoft Login, you will not see the **Change Password** button.

Auto Logout

To meet regulatory requirements and prevent unattended use, **DFsend** has an Auto Logout feature that closes the application after 15 minutes of inactivity. If **DFsend** is idle for the interval, it automatically closes the current login session.

To continue, click **Login again**, or **Exit** and restart **DFsend**.

If Auto Logout occurs when there are documents that have been queued but not sent, these documents are cleared.

Any keyboard input or mouse movement inside **DFsend** resets the Auto Logout timer. Auto Logout also does not occur during file transmission. Once a transmission has completed, the timer is reset.

Certificate Info

DFsend communicates with the **DFdiscover** server using HTTPS on port 443. This port must be open on any firewalls between the local computer and the study server.

This is industry-standard technology that encrypts the bi-directional communication using a 'certificate of trust' provided by the server. It is the same technology used by banks and the majority of secure, global web services.

You can visually confirm that the communication is secure. Select **Help** > **Certificate Info** and look for the green checkmark.

Send Logging

This chapter describes the send logging capabilities of **DFsend**.

Accessing the Send Log

DFsend keeps a log of all transmission activity for each user.

By default, the send log is not visible. Click **Show Log** to display the historical log of PDF documents that you have sent from the current computer.

The log lists the PDF documents sent by you (the login user) from the current computer, the status and the date/time. The log does not show transmissions made by you on other computers, or by other users on the same computer.

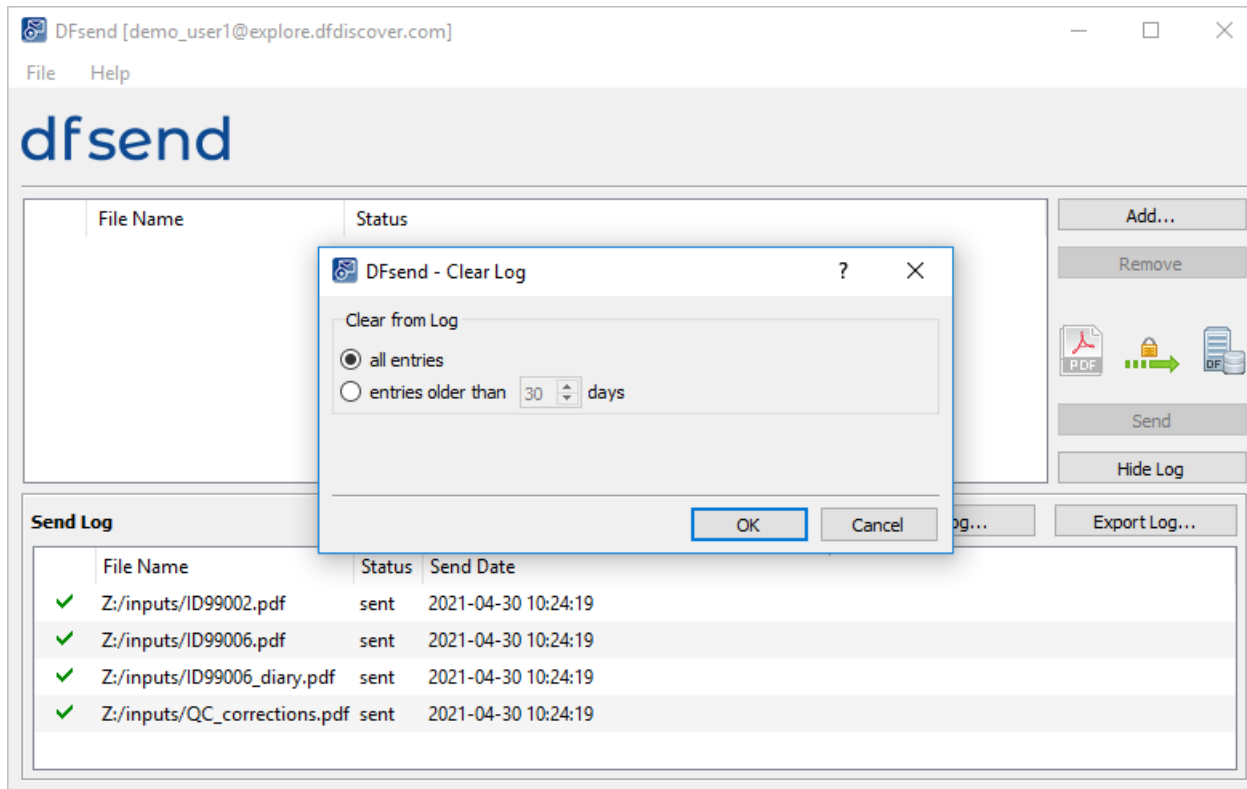

The total number of log entries and the total number of successful transmissions appear in the header of the log window.

Each time a PDF file is sent an entry for the transmission is added to the head of the log file. Send logging includes the full path and name of the sent PDF file, the transmission status and the date and time that the file was submitted by the user.

To close the log window, click **Hide Log**. Closing the log does not delete or clear log entries.

Clear Log

To clear or delete some, or all, log entries for your current and previous **DFsend** sessions on this computer, click **Clear Log...**.

It is possible to selectively clear some log entries. Selecting **all entries** removes all transmission entries belonging to you from the log on this computer. Selecting **entries older than ## days** clears only those log entries that are older than the specified number of days. 30 days is the default, but this can be changed to any number of days between 1-999.

Entries for transmissions made by other users or by yourself on a different computer are not included or impacted.

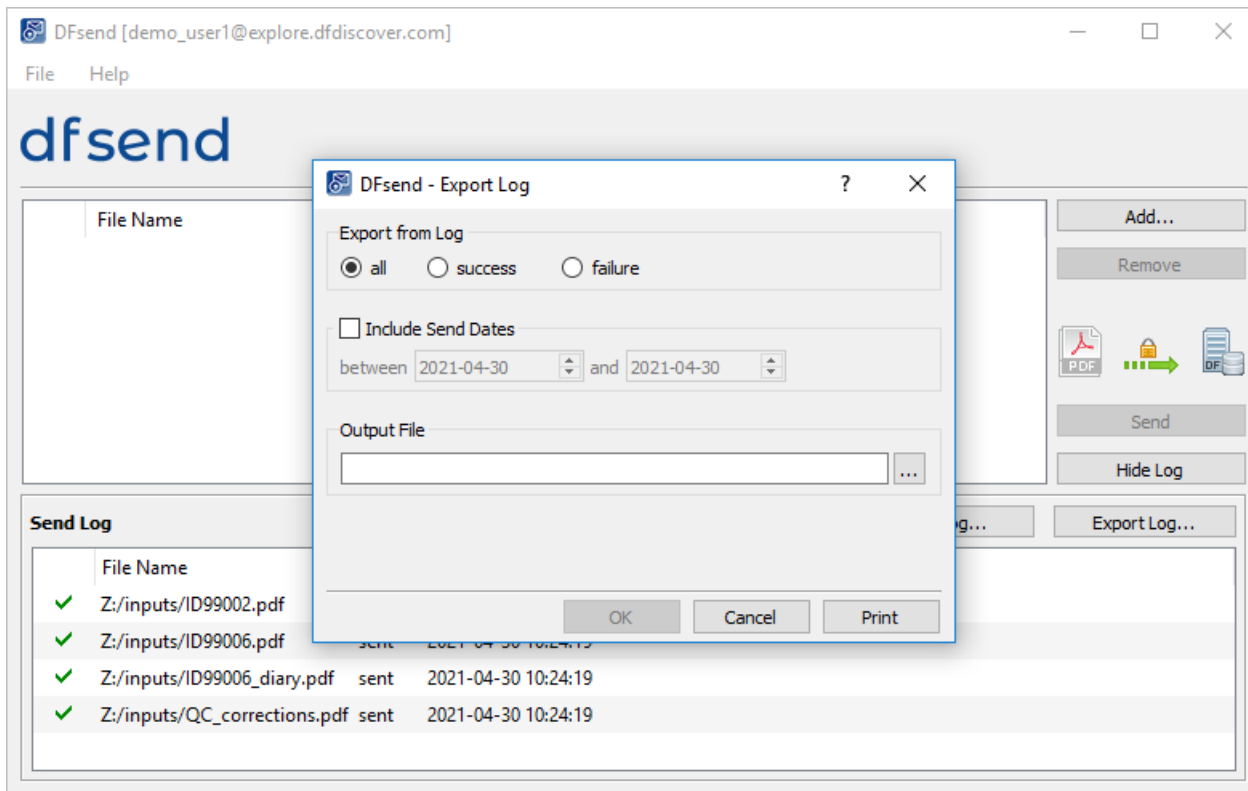

Clearing entries from the send log does not remove any content from the study server. For example, selecting **Page** > **Context** in **DFexplore** will always show who sent the page and when it arrived.

Exporting the Send Log

Several actions can be applied to the send log. When the log is visible, you can:

- save the log as a PDF file,
- save the log as a CSV file,
- print the log.

To export the send log, click **Export Log...**. This opens the **Export Log** dialog.

From the dialog,

- Choose the type of logged transmission: **all**, **success** or **failure**.
- Optionally, check **Include Send Dates** and enter a date range to filter log entries of interest. If **Include Send Dates** is not checked, no date filtering is applied.
- To export log entries to a file, enter a complete path and file name in **Output File** (including the appropriate file extension) and click **OK**. If printing, leave **Output File** blank and click **Print**.

Copyrights

External Software Copyrights

DFdiscover software uses several third-party software components as part of its server side and/or client tools.

The copyright information for each is provided below. If you would like to receive source codes of these third-party components, please send us your request at help@dfnetresearch.com.

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

1. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

2. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

3. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided

that you also meet all of these conditions:

- a. You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b. You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c. If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.) These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

4. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:
 - a. Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
 - b. Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
 - c. Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.) The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object

code.

5. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.
6. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.
7. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.
8. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

9. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.
10. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

11. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally. NO WARRANTY
12. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.
13. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Ghostscript

The files in the base, psi, lib, toolbin, examples, doc and man directories (folders) and any subdirectories (sub-folders) thereof are part of GPL Ghostscript.

The files in the Resource directory and any subdirectories thereof are also part of GPL Ghostscript, with the explicit exception of the files in the CMap subdirectory (except "Identity-UTF16-H", which is part of GPL Ghostscript). The CMap files are copyright Adobe Systems Incorporated and covered by a separate, GPL compatible license.

The files under the jpegxr directory and any subdirectories thereof are distributed under a no cost, open source license granted by the ITU/ISO/IEC but it is not GPL compatible - see jpegxr/COPYRIGHT.txt for details.

GPL Ghostscript is free software; you can redistribute it and/or modify it under the terms the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

GPL Ghostscript is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program so you can know your rights and responsibilities. It should be in a file named doc/COPYING. If not, write to the

Free Software Foundation, Inc.,

GNU LESSER GENERAL PUBLIC LICENSE Version 2.1, February 1999 <https://www.gnu.org/licenses/lgpl-2.1.html>

Copyright© 1991, 1999

Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method:

1. we copyright the library, and
2. we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

1. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these

terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

2. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

3. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:
 - a. The modified work must itself be a software library.
 - b. You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
 - c. You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
 - d. If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful. (For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

4. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

5. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

6. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

7. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License.

Also, you must do one of these things:

- a. Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable

"work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

- b. Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that
 - i. uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and
 - ii. will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.
- c. Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.
- d. If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.
- e. Verify that the user has already received a copy of these materials or that you have already sent this user a copy. For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

- f. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:
 - a. Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.
 - b. Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.
- g. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.
- h. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.
- i. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this

License.

- j. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

- k. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.
- l. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

- m. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

- n. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

- o. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

QtAV

© Wang Bin wbsecg1@gmail.com Shanghai University->S3 Graphics->Deepin, Shanghai, China 2013-01-21

QtAV is free software licensed under the term of LGPL v2.1. The player example is licensed under GPL v3. If you use QtAV or its constituent libraries, you must adhere to the terms of the license in question.

Rather than repeating the text of the LGPL v2.1, the original text can be found in [GNU LESSER GENERAL PUBLIC LICENSE, Version 2.1](#).

FFmpeg

Most files in FFmpeg are under the GNU Lesser General Public License version 2.1 or later (LGPL v2.1+). Read the file `COPYING.LGPLv2.1` for details. Some other files have MIT/X11/BSD-style licenses. In combination the LGPL v2.1+ applies to FFmpeg.

Rather than repeating the text of the LGPL v2.1, the original text can be found in [GNU LESSER GENERAL PUBLIC LICENSE, Version 2.1](#).
